CMSE 801 - Day 10

Compartmental Modeling

October 5, 2022

General Course Announcements

- Homework 2 has been released Tuesday Sep 27 and is due Wednesday Oct 12 at 11:59 p.m.
- Midterm will be on Wednesday Oct 19 during the class
- The details of the semester project have been released
- Office hours of Yann-Meing will now be Tuesday from 1:00-3:00 p.m.

Questions/comments from Day 10 PCA

- Are there some ways to highlight the code where it needs attention? I always get lost in the long code.
- How can you input the rates of κ and c when there are two different rates?
- maybe going over more of compartmental modeling? It still doesn't make a whole lot of sense to me.
- Plotting the Indivdual ode functions on the same plot
- I don't understand the from IPython.display import display, clear_output, set_matplotlib_formats and the number that is in plt.subplot(313)
- what are we supposed to do for the last part?

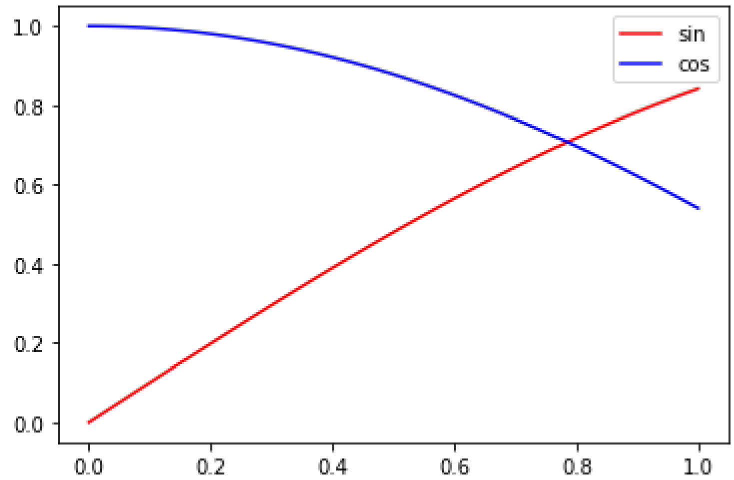
- Nothing but I wish there is some function for spelling checking and autofill, especially for the parameters with long name.
- Will we receive our scores for HW1 prior to the due date of HW2?
- Thank you! / nope. This class is very helpful. / No questions, thank you!

In [1]:
```
import numpy as np
import matplotlib.pyplot as plt
%matplotlib inline
```

In [2]:
```
x = np.linspace(0,1,100)
y = np.sin(x)
z = np.cos(x)
```

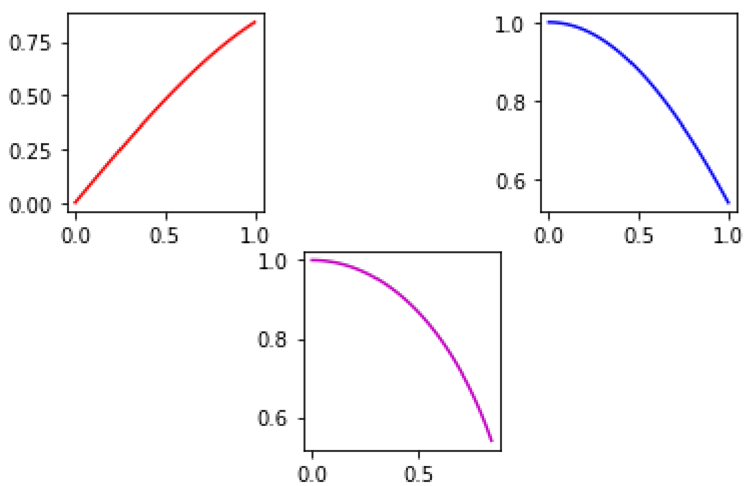
In [3]:
```
plt.plot(x,y,'r',label='sin')
plt.plot(x,z,'b',label='cos')
plt.legend()
```

Out[3]:
```
<matplotlib.legend.Legend at 0x7fdc054c3310>
```



In [4]:
```
plt.subplot(231)
plt.plot(x,y,'r')
plt.subplot(233)
plt.plot(x,z,'b')
plt.subplot(235)
plt.plot(y,z,'m')
```

Out[4]: [<matplotlib.lines.Line2D at 0x7fdc056b13d0>]



In-class assignment

- At the end, 4 minutes of presentation and 1 minute of questions!
- Presentations starts at 9:10 a.m.
