

1. Part 1 (35 points)

- Q1 (15 pts):
 - 2 pts: importing modules
 - 3 pts: init values are defined
 - 2 pts: time range is correct
 - 6 pts: function is defined correctly, accepting parameters, returning derivatives
 - 2 pts: results from ideint are saved for later use
- Q2 (8 pts):
 - 4 pts: plot is shown
 - 2 pts: lines have different colors
 - 1 pt: labels on plot
 - 1 pt: legend on plot
- Q3 (2 pts):
 - 1 pt: if the answer indicates the lines are growing linearly and parallel (the same)
 - 1 pt: if the answer indicates their explanation why/why not
- Q4 (4 pts):
 - give all points for plot for first 10 hours unless:
 - deduct 1pt if the range is not right
 - deduct 1pt if not plotted by slicing
- Q5 (1 pts):
 - 1pt: if the answer indicated time around 2h
- Q6 (5 pts):
 - 2 pts: function and computation is done again (using whatever method)
 - 2 pts: plotted the right plot, with right time scale
 - can deduct 1 pt if the plot is NOT clear (no labels, no title, lines with same color, ...)
 - 1 pt: answer indicates the pollutant in lakes level
